

Concepts

- **Hazard-** Potential Threats
- **Disaster-** Loss of life, Damage to infra, degradation of environ
- **Vulnerability** — Conditions which make us prone
- **Capacity-** Strengths which help us face disasters
- **Risk** — Expected Losses $H \times V/C$
- **Exposure-** Situation of people, infrastructure, housing, production capacities and tangible human assets located in hazard-prone areas. Figuring out what and who might be affected by a disaster. Understanding what could get damaged if disaster strikes
- **Disaster Risk Management-** Reduce existing disaster risk and manage residual risk
- **Disaster Risk Reduction-** Prevent creation of new risks
